

# SportKAT™ Documented Vestibular Rehabilitation!

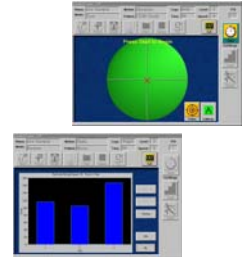

## HOW IT WORKS!

The Sportkat 4000 provides exercise to the Neurosensory System. The protocol requires all three of the peripheral systems to work together to perform multiple functions. This helps the body re-train and improve proprioception and to develop new neurosensory pathways, thereby improving balance and neuromuscular coordination.

## Documented Testing:

- Static Testing
- Dynamic Testing
- Scores from 0 to 5000
- Graphing
- Norms
- Screening Risk of Falls
- Variable Difficulty Levels

## Documented Rehabilitation:

- Documented baseline assessment
- Documented graphing progress
- Documented for functional improvement
- Documented variable difficulty levels
- Justification for reimbursement
- Compliance not an obstacle, It's FUN!

## Installation and Training Included

- Installation & Training onsite
- Billing assistance by an Independent specialist
- Software updates available
- Extended Warranty available
- Tech Support and customer service to assist you
